Meet the team

Jonathan Cherane 45683638: Project Manager & Visual Designer Branding Specialist

Martinus von Holtzhausen 45628467: The UX/UI Designer (Core Features)

Neo von Benecke 40898253: The UX/UI Designer (Social & Dashboard)

Samuel Mthuli 45672202: Integration Designer & Prototyper

Siphesihle Masilela 51298546: The Researcher & Content Specialist

Meaning of the Roles

1. Project Manager / Team Lead and Visual Designer & Branding Specialist

Responsibilities:

- Oversee the entire project timeline and ensure deadlines are met.
- Coordinate communication between team members.
- Assign tasks and ensure everyone is on track.
- Conduct regular check-ins to review progress.
- Develop the visual identity of Harmoni (e.g., color palette, typography, icons, and illustrations).
- Ensure the design aligns with the app's purpose of balance and harmony.
- Create a style guide for consistency across all screens.

Figma Tasks:

- Organize the Figma file structure (e.g., pages for wireframes, prototypes, and design systems).
- Ensure consistency across all screens and features.
- Design the app's logo, icons, and other visual elements.
- Create a design system in Figma (e.g., reusable components for buttons, cards, and menus).

2. UX/UI Designer (Core Features)

Responsibilities:

- Design the user interface for the Health & Fitness
- Management and Academic Schedule Optimization features.
- Create wireframes, mockups, and prototypes for these sections.
- Ensure the design is user-friendly and aligns with the app's purpose.

Figma Tasks:

- Design screens for weight tracking, workout scheduling, diet planning, class schedules, and study planners.
- Focus on usability and accessibility.

3. UX/UI Designer (Social & Dashboard)

Responsibilities:

- Design the interface for the Activity Discovery & Social
- Connection and Integrated Dashboard features.
- Create visually appealing and intuitive layouts for social features, event reminders, and the unified dashboard.

Figma Tasks:

- Design screens for interest-based suggestions, peer connections, event reminders, and the dashboard.
- Ensure the dashboard is clean, organized, and easy to navigate.

4. Researcher & Content Specialist

Responsibilities:

- Research best practices for health, academic, and social features.
- Gather content for mental health tips, workout plans, diet suggestions, and academic resources.
- Write microcopy for the app (e.g., button labels, tooltips, and notifications).

Figma Tasks:

- Collaborate with designers to ensure content fits seamlessly into the designs.
- Add placeholder text and refine it during the design process.

5. Interaction Designer & Prototyper

Responsibilities:

- Focus on the interactivity and flow of the app.
- Create clickable prototypes to demonstrate how users will navigate through the app.
- Test and refine user flows for optimal usability.

Figma Tasks:

- Use Figma's prototyping tools to link screens and create interactive demos.
- Test prototypes with team members to identify and fix usability issues.

Proposal for Harmoni: A Holistic Lifestyle Management App

Introduction

In today's fast-paced world, balancing health, academics, and personal growth has become increasingly challenging, especially for students. To address this, we propose *Harmoni*, a holistic lifestyle management app designed to help users achieve harmony by integrating health, academic, and social features into one seamless platform. Derived from the word "Harmony," Harmoni empowers users to effectively manage their physical well-being, academic responsibilities, and personal development. This proposal outlines the app's core features, benefits, and implementation plan, demonstrating its potential to make a meaningful impact on users' lives.

Problem Statement

Students and young professionals often struggle to balance their health, academic commitments, and personal growth. Poor time management, lack of access to personalized resources, and limited social engagement opportunities can lead to stress, burnout, and suboptimal performance. Existing solutions are often fragmented, requiring users to juggle multiple apps for fitness, academics, and social activities. Harmoni addresses this gap by providing a unified platform that integrates all these aspects, promoting a balanced and fulfilling lifestyle.

Core Features

Harmoni's features are designed to address the key challenges users face:

1. Health & Fitness Management

- Track weight, body measurements, and health metrics.
- Create personalized workout plans and schedule sessions.
- Generate budget-friendly meal plans tailored to dietary needs.

- Access daily mental health tips and mindfulness exercises.

2. Academic Schedule Optimization

- Sync class schedules from universities like North West University.
- Analyze free time and create study plans.
- Set reminders for assignments, exams, and projects.

3. Activity Discovery & Social Connection

- Discover clubs, societies, workshops, and volunteer opportunities based on interests.
- Connect with peers for study groups or activities.
- Receive event reminders and deadlines.

4. Integrated Dashboard

- A unified view of upcoming classes, workouts, meal plans, and events.
- Progress updates and mental health tips.

5. Customization & Accessibility

- Tailor the app to individual schedules, budgets, and preferences.
- Designed for students and non-students alike, ensuring inclusivity.

Benefits to Users

-Harmoni offers numerous benefits:

- Improved Well-being: By integrating health and fitness tools, Harmoni helps users maintain physical and mental health.
- Academic Success: The academic scheduling and study planning features ensure users can manage their time effectively.

- Personal Growth: Activity discovery and social connection features encourage users to explore new interests and build meaningful relationships.
- Inclusivity: Harmoni is designed for users of all ages, making it versatile and accessible.

Implementation Plan

The project will be executed in four phases:

1. Research & Planning (March): Conduct market research, define user personas, and create a project plan.
2. Design & Prototyping (April- May): Design the app's interface and create interactive prototypes using Figma.
3. *Development (May): Build the app's core features, focusing on health, academics, and social integration.
4. Testing & Launch (June): Conduct user testing, refine the app, and prepare for launch.

Expected Outcomes

- A fully functional MVP that integrates health, academic, and social features.
- Positive user feedback indicating improved well-being, academic performance, and social engagement.
- A growing user base, including students and non-students, benefiting from Harmoni's features.

Conclusion

Harmoni is more than just an app; it's a tool for achieving balance and harmony in life. By addressing the challenges of health, academics, and personal growth, Harmoni has the potential to make a significant impact on users' lives. We seek your approval to move forward with this project, which aligns with our goal of creating innovative, user-centric solutions. With your support, we can bring Harmoni to life and empower users to live healthier, more productive, and fulfilling lives.
